

Product Catalog

Product Catalog – MVP Evidence

This module provides a centralized product catalog where users can view and manage the products available in the system. The interface includes product information such as name, code, category, price, stock, and status. It also provides search and filtering options to facilitate product management.

The second view demonstrates the stock update functionality, allowing the user to select a product, enter the quantity to add, and specify the reason for the stock adjustment.

Inventory Management

Inventory Management – MVP Evidence

This module allows users to monitor and manage the current inventory of products. The inventory table displays relevant information such as product code, product name, category, stock, minimum stock level, and product status.

The second view shows the product creation form, where users can register a new product by entering its basic information, category, description, inventory data, prices, and product image.

Client Management

Client Management – MVP Evidence

This module provides functionality for managing customer information. Users can view registered customers and access relevant information such as name, telephone number, email address, and customer status.

The second view demonstrates the customer registration form, which allows users to create a new customer by entering their personal and contact information. The form also includes an option to define the customer's active status.

The image displays two screenshots of the PÉTALOS ADMIN web application interface, which is part of the BY SELLENS PLATFORM.

Top Screenshot: Clientes (Clients) Management

The interface shows a sidebar with navigation options: Productos, Inventario, Clientes (selected), and Ventas. The main content area is titled "PÉTALOS ADMIN Clientes" and includes a subtitle "Registra y administra la información de tus clientes." A "Nuevo cliente" button is visible in the top right corner.

The "Gestión de clientes" section indicates "2 clientes registrados" and provides a search bar. Below is a table listing the registered clients:

ID	Cliente	Teléfono	Correo electrónico	Dirección	Estado	Acciones
1	Maria López	3001234567	maria.lopez@gmail.com	Calle 10 # 15-20	Activo	[Editar] [Eliminar]
2	Luis Gasca	3132922471	gasca@gmail.com	Calle 8a # 11-28	Activo	[Editar] [Eliminar]

Bottom Screenshot: Nuevo cliente (New client) Registration Form

The interface shows the "PÉTALOS ADMIN Nuevo cliente" form, with a subtitle "Registra un nuevo cliente en el sistema." The form is divided into two main sections:

- Información del cliente:** Fields for "Nombre completo" (Ej. Maria López), "Teléfono" (Ej. 300 123 4567), "Correo electrónico" (Ej. cliente@gmail.com), and "Dirección" (Ej. Calle 10 # 15-20).
- Estado del cliente:** A section titled "Estado del cliente" with a subtitle "Define si el cliente está disponible para nuevas ventas." It includes a toggle switch for "Cliente activo" (Disponible para registrar ventas).

At the bottom of the form are "Cancelar" and "Registrar cliente" buttons.

Sales Management

Sales Management – MVP Evidence

This module allows users to register and manage sales transactions. The main view provides a summary of registered sales, total sales value, and the number of customers involved in transactions.

The second view demonstrates the sales registration process, where the user can select a customer, add one or more products, specify quantities, and select a payment method before registering the sale.
